

The histogram displays the frequency of the number of days between the first and last COVID-19 case in a household. The x-axis is labeled 'Days' and ranges from 01-02 to 19-07. The y-axis is labeled 'Frequency' and ranges from 0 to 10. The distribution is right-skewed, indicating that most households experience their first and last cases within a short period, typically within the first 100 days. The highest frequency is observed in the 01-02 to 15-02 range, with a frequency of approximately 9. The frequency drops sharply after 15-03, with most cases occurring within the first 100 days.
